Camera Overview

The D-Link DCS-7517 5 Megapixel Day & Night Outdoor Network Camera is a high definition professional surveillance and security solution suitable for small, medium, and large enterprises. The camera uses a high resolution 1/3" 5 megapixel sensor with digital WDR image enhancement to deliver balanced video in varying lighting conditions. With 2560 x 1920 resolution, the DCS-7517 captures more detail in areas such as license plates, faces and currency. The rugged design makes this camera ideal for deployment in a wide variety of surveillance applications.

High-Quality Streaming & Recording

To maximize bandwidth efficiency and improve image quality, the DCS-7517 provides real-time video compression using the H.264 and MJPEG codecs, and supports three separate profiles for simultaneous video streaming and recording. This versatility enables a wide variety of security applications, such as monitoring public areas to detect incidents and to coordinate responses, enforcing access control to restricted areas, deterring criminal activity, or monitoring inventory.

Continuous Monitoring

The DCS-7517’s digital wide dynamic range (WDR) video enhancement gives you improved image quality in environments with uneven or difficult lighting, so you can identify subjects that are backlit or in brightly lit areas. In low-light situations, the IR cut filter automatically slides out of the way to use all available light. The DCS-7517 also has built-in IR LED illuminators with a 90 foot range, allowing the camera to keep watch even in complete darkness. These features work together to give you a reliable surveillance camera capable of monitoring an area 24 hours a day.
**Video Management Software**

The DCS-7517 5 Megapixel Day & Night Outdoor Network Camera includes D-ViewCam, a complete surveillance software package that enables you to view, manage, and record from up to 32 cameras on a single computer in a central location. Recordings and e-mail alerts can be triggered through motion detection or events triggered by digital input devices, keeping administrators informed of any unusual activity.

**Flexible Connectivity**

The DCS-7517 has a built-in 802.3af compliant PoE module that simplifies installation by providing power and networking connectivity with a single cable, reducing the need to drill holes or lay additional cabling.

### Security

- Administrator and user group protection
- Remote client access control
- HTTP and RTSP authentication
- HTTPS encryption for web access

## System Management

### System Requirements for Web Interface

- Browser: Internet Explorer 8 or higher, Firefox, Chrome, Safari

### Event Management

- Motion detection
- Event notification and uploading of snapshots/video clips via e-mail or FTP
- Supports multiple HTTP, SMTP, and FTP servers
- Multiple event notifications
- Multiple recording methods for easy backup

### Remote Management

- Take snapshots/video clips and save to local hard drive
- Configuration interface accessible via web browser

### OS Support (for setup utility)

- Operating System: Windows 8/7/Vista

### D-ViewCam™ System Requirements

- Operating System: Microsoft Windows 8/7/Vista
- Web Browser: Internet Explorer 8 or higher
- Protocol: Standard TCP/IP

### D-ViewCam™ Software Functions

- Remote management/control of up to 32 cameras
- Supports all management functions provided in web interface
- Viewing of up to 32 cameras on one screen
- Scheduled motion triggered, or manual recording options

## General

### Weight

- 2.75 lbs (1.25 kg) ± 5% for camera only, without sunshield and mounting bracket

### Power

- External power adapter: 12 V DC 1.5 A, 50/60 Hz, IEEE
- PoE: 802.3af Class 0
- Max: 12.48 W

### Temperature

- Operating: -40° to 122° F (-40° to 50° C)
- Storage: -4° to 158° F (-20° to 70° C)

### Humidity

- Operating: 20% to 80% non-condensing
- Storage: 5% to 95% non-condensing

### Certifications

- CE
- CE LVD
- ICES-003
- FCC
- C-Tick

### Warranty

- 5 Year Warranty
### Dimensions
