

Event trigger based recording

Connect 2 hard drives of up to 4TB each

No monthly fees or service contracts

Easy do-it-yourself installation

# DNR-202L mydlink® CAMERA VIDEO RECORDER

## Features

### Security

- Simultaneous live viewing and playback during recording
- Continuous recording with automatic overwrite function
- Useful playback with step/fast forward, enhance video image and backup
- User-friendly UI for live view with full-screen, snapshots and PTZ control

### Ease of Use

- Supports up to 4 D-Link Wi-Fi Cameras<sup>1</sup>
- Supports 2 USB external hard drives<sup>2</sup> for ease of expansion
- Supports 4 channel playback simultaneously
- Supports H.264, MPEG-4 or MJPEG real-time recording
- Easy network camera setup and management
- DHCP and Static IP assignment support

### Convenient Control with mydlink® Support

- Supports mydlink web portal for easy Internet access
- Auto-searches for D-Link Wi-Fi Cameras on your network

## Overview

The DNR-202L mydlink Camera Video Recorder can record video from up to four D-Link Wi-Fi Cameras to any connected USB hard drives (up to two at 4TB each), eliminating the need for a dedicated PC. Unlike traditional CCTV recording solutions, the mydlink Camera Video Recorder provides an economic solution by utilizing existing IP infrastructure and makes storage much more flexible with your own USB drives. Simultaneous live view or playback while recording as well as complete video management and easy custom configuration, make the DNR-202L a convenient and reliable network video recorder that is perfect for your home or small office use.

## All-In-One Security Solution

Multi-camera & full screen live viewing and ultra-smooth pan, tilt and zoom functionalities<sup>3</sup> let you monitor your connected cameras with precision and confidence. The DNR-202L features a clear and simple interface for straightforward configuration including compression, resolution and frame rate for all connected cameras. Once the cameras have been set up, recordings can be created continuously with automatic overwrite function, or according to a user-defined schedule. The mydlink Camera Video Recorder also provides event recording based on specific triggers such as when motion or sound is detected.

## Convenient Access Anytime, Anywhere with mydlink®

With the mydlink View - NVR app for iOS and Android devices<sup>4</sup>, you can quickly and easily view your camera feed or search recorded footage from anywhere with a Wi-Fi, 3G or 4G connection. Set up is easy - simply run the setup wizard, assign your DNR-202L to your mydlink account (or set up an account if you are a first time user), and you are ready to go. The mydlink Camera Video Recorder will even automatically discover the D-Link Wi-Fi Cameras in your network.
